

NOTE: Actual product does not come with an enclosure

Product Numbers:

NWC-902-21 (without linear encoder)
NWC-903-21 (with linear encoder)

- Compact chassis mount
- Intuitive hand held program box for programming simplicity and error diagnostics
- Standard secondary current feedback
- Current update every 1/2 cycle
- Linear encoder option for nut detection
- Simple replacement of obsolete weld controls
- Stepper function for spot welding
- Counter function for parts production
- "Weld Data Management" software option for timer parameter and schedule management
